SLUICE/SLIDE GATES by Watch Technologies

The right gate - at the right price – manufactured in-house

Regardless of the application or size, Watch Technologies' sluice gates are durable, simple by design, easily maintained, customizable, and ready for any sort of actuation and automation.

Robust gates, competitively priced:

- WT gates are manufactured in any size, shape, or configuration
- Can be manufactured using stainless steel (304 or 316), powder-coated A36 carbon steel, or aluminum; WT gates can be certified BABA compliant
- Ship in 6–10 weeks after drawing approvals, depending on material availability, our manufacturing queue at the time of order and quantity; expedited manufacturing is available
- Arrive complete and ready to install
- Ready to be automated with WT actuators or other's actuators
- WT automation includes stand-alone operations, remote control via any Internet connection, or as nodes in a system of gates

Typical Small Sluice Gate

No integration required:

- Watch Technologies takes gate manufacture to a new level by **manufacturing the gates, actuators, and control systems in-house.**
- There is no system integration required with WT gate systems; they drop in the hole ready to go.

Double Spindle Gate
